

PRESSURE REDUCING AND DESUPERHEATING STATION (PRDS)

We also design and manufacture PRDS stations tailored to the specific requirements of our customers.

The purpose of a pressure reducing station is to manage and control the pressure of a gas or liquid in a pipeline system. It guarantees that the pressure is kept at a safe and ideal level for a range of applications, avoiding equipment damage and guaranteeing effective operation.

SIZE: 1" to 12" (25mm to 300mm)

CLASS: 150# to 600#

AREAS OF APPLICATIONS

Chemical Processing
Oil and Gas Industry
Water and Wastewater Treatment
Power Generation
HVAC Systems

HybridOX
Automation LLP
